Dr. Omar Abadi  
Associate Director, Center for Team Science and Community Engagement  
Local Research University  
Department of Preventive Medicine  
1234 N. Collaboration Street, Suite 1400  
Anytown, USA 11111

Dear Dr. Omar Abadi,

On behalf of ABC Health, I am pleased to submit this strong letter in support of the National Heart, Lung, and Blood Institute (*NHLBI*) *CAIRS: Clean Air ImpRovement Solutions* study. We believe this project could have a significant impact in improving air quality outcomes for the communities we serve.

ABC Health's (ABCH) mission is to ensure communities have access to clean and healthy physical environments, which include air, water, and green spaces. Over the past seven years, ABCH has conducted educational programs on respiratory health issues related to poor air quality for all ages. Collaborating with Dr. Abadi and LRU on this grant would support ABCH's strategic plan to increase air quality resources and improve health education in our community by 20XX. If funded, this collaboration can serve as an opportunity to leverage additional resources that LRU has to offer. This proposal also aligns with ABCH's goal of supporting sustainable community engagement initiatives.

Our organization currently holds ongoing educational sessions twice a month to raise awareness and up to date information on air quality in our community. Attendance ranges from 50-70 people per session. We welcome the opportunity to expand and evaluate the impact of these sessions.

In sum, ABC Health is delighted to support Dr. Abadi's proposal *CAIRS: Clean Air ImpRovement Solutions - Assessing the Effectiveness of Air Quality Education*. We believe this project will be a significant contribution to community-engaged research in the arena of environmental health research.

If you have any questions about this letter of support, do not hesitate to contact me.

Sincerely,

*Naomi Lewis*
